

Grand Traverse County has a moderate risk profile above glacial aquifers. Iron is the primary concern, driven by geological sources. Contamination is often invisible — testing is the only way to confirm your well's safety.

MODERATE

OVERALL RISK LEVEL

YOUR TOP WATER QUALITY RISKS

CONTAMINANT	HOW COMMON	RISK LEVEL	SOURCE & CONTEXT
Iron*	~27% above aesthetic limit	Moderate	Geological — Common in glacial and alluvial aquifers; staining and taste
Arsenic	~20% above limit	High	Geological — Naturally dissolves from bedrock and glacial sediment
Lead	~2% above limit	Low-Moderate	Infrastructure — Older well casing materials and household plumbing
Chloride*	~100% of wells	Low-Moderate	Road/Geological — Road salt application and natural mineral deposits
Fluoride	~83% of wells	Low-Moderate	Geological — Naturally elevated in some deep or volcanic aquifers

\* Secondary standard — an aesthetic limit for taste, odor, or staining. Not a health-based EPA limit.

WHAT TO DO NEXT

- Order a water test.**  
Test for Iron, Arsenic, Lead, Chloride, coliform bacteria. Bacteria annually; others every 3–5 years.
- Get your free county report.**  
See full data, treatment options, and certified labs at <https://yourwaterreport.com/states/mi/grand-traverse-county/>
- Upload your lab results.**  
We'll interpret them, flag anything above limits, and recommend next steps — free.

WHAT YOUR RESULTS MEAN

Use this to interpret your lab report — match the contaminant to your result.

IF YOUR TEST SHOWS	WHAT IT MEANS	CONSIDER
Bacteria detected	Immediate concern	Shock chlorination; add UV system
Iron > 0.3 mg/L	Staining, taste — aesthetic issue	Oxidizing iron filter
Arsenic > 10 µg/L	EPA limit exceeded — chronic cancer risk	Reverse osmosis or activated alumina filter
Lead > 15 µg/L	EPA action level exceeded	RO filter; inspect well casing
Fluoride > 4 mg/L	EPA limit exceeded — skeletal risk	RO filter or activated alumina

WHO SHOULD USE THIS

- Homeowners on private wells — not covered by public water testing
- Home buyers doing due diligence before closing
- Families with infants, elderly, or immunocompromised members
- Anyone who hasn't tested their well in the past 3 years
