

Jackson County has a lower-risk groundwater profile. Lead is detected in ~67% of wells, driven by infrastructure sources. Contamination is often invisible — testing is the only way to confirm your well's safety.

OVERALL RISK LEVEL

YOUR TOP WATER QUALITY RISKS

CONTAMINANT	HOW COMMON	RISK LEVEL	SOURCE & CONTEXT
Lead	~67% of wells	High	Infrastructure — Older well casing materials and household plumbing
Arsenic	~50% of wells	High	Geological — Naturally dissolves from bedrock and glacial sediment
Fluoride	~50% of wells	Low–Moderate	Geological — Naturally elevated in some deep or volcanic aquifers
Uranium	~86% of wells	Low–Moderate	Geological — Naturally occurring in granitic and sedimentary bedrock
Iron*	~67% of wells	Low–Moderate	Geological — Common in glacial and alluvial aquifers; staining and taste

* Secondary standard — an aesthetic limit for taste, odor, or staining. Not a health-based EPA limit.

WHAT TO DO NEXT

- Order a water test.**
Test for Lead, Arsenic, Fluoride, Uranium, coliform bacteria. Bacteria annually; others every 3–5 years.
- Get your free county report.**
See full data, treatment options, and certified labs at <https://yourwaterreport.com/states/nc/jackson-county/>
- Upload your lab results.**
We'll interpret them, flag anything above limits, and recommend next steps — free.

KNOW YOUR WELL

Well age / year drilled _____

Last water test date _____

Treatment systems installed _____

Well driller / service contact _____

WHAT YOUR RESULTS MEAN

Use this to interpret your lab report — match the contaminant to your result.

IF YOUR TEST SHOWS	WHAT IT MEANS	CONSIDER
Bacteria detected	Immediate concern	Shock chlorination; add UV system
Lead > 15 µg/L	EPA action level exceeded	RO filter; inspect well casing
Arsenic > 10 µg/L	EPA limit exceeded — chronic cancer risk	Reverse osmosis or activated alumina filter
Fluoride > 4 mg/L	EPA limit exceeded — skeletal risk	RO filter or activated alumina
Uranium > 30 µg/L	EPA limit exceeded — kidney risk	Reverse osmosis or ion exchange
Iron > 0.3 mg/L	Staining, taste — aesthetic issue	Oxidizing iron filter

WHO SHOULD USE THIS

- Homeowners on private wells — not covered by public water testing
- Home buyers doing due diligence before closing
- Families with infants, elderly, or immunocompromised members
- Anyone who hasn't tested their well in the past 3 years
