

Muskingum County has an elevated risk profile. Manganese is detected in ~75% of wells, driven by geological sources. Contamination is often invisible — testing is the only way to confirm your well's safety.

## YOUR TOP WATER QUALITY RISKS

CONTAMINANT	HOW COMMON	RISK LEVEL	SOURCE & CONTEXT
Manganese*	~75% of wells	Moderate	Geological — Found in reducing aquifer zones alongside iron
Lead	~67% of wells	High	Infrastructure — Older well casing materials and household plumbing
Iron*	~73% above aesthetic limit	Moderate	Geological — Common in glacial and alluvial aquifers; staining and taste
Arsenic	~52% above limit	High	Geological — Naturally dissolves from bedrock and glacial sediment
Sulfate*	~42% above aesthetic limit	Moderate	Geological — Natural dissolution from gypsum and sulfate minerals

\* Secondary standard — an aesthetic limit for taste, odor, or staining. Not a health-based EPA limit.

## WHAT TO DO NEXT

- Order a water test.**  
Test for Manganese, Lead, Iron, Arsenic, coliform bacteria. Bacteria annually; others every 3–5 years.
- Get your free county report.**  
See full data, treatment options, and certified labs at <https://yourwaterreport.com/states/oh/muskingum-county/>
- Upload your lab results.**  
We'll interpret them, flag anything above limits, and recommend next steps — free.

## KNOW YOUR WELL

Well age / year drilled

Last water test date

Treatment systems installed

Well driller / service contact

## WHAT YOUR RESULTS MEAN

Use this to interpret your lab report — match the contaminant to your result.

IF YOUR TEST SHOWS	WHAT IT MEANS	CONSIDER
Bacteria detected	Immediate concern	Shock chlorination; add UV system
Manganese > 0.05 mg/L	Aesthetic + health concern at high levels	Oxidation + filtration system
Lead > 15 µg/L	EPA action level exceeded	RO filter; inspect well casing
Iron > 0.3 mg/L	Staining, taste — aesthetic issue	Oxidizing iron filter
Arsenic > 10 µg/L	EPA limit exceeded — chronic cancer risk	Reverse osmosis or activated alumina filter

## WHO SHOULD USE THIS

- Homeowners on private wells — not covered by public water testing
- Home buyers doing due diligence before closing
- Families with infants, elderly, or immunocompromised members
- Anyone who hasn't tested their well in the past 3 years
